## ⚠ Change from 2014

SRD 2024 keeps this simple rule; the 2014 encumbrance variant becomes an option.

---

## ⚠ Flaw in the rule and fixes Table rule

The SRD doesn't say how to count coins. Fix: 50 coins weigh about 1 pound.

## 💡 Narrative option: Table rule

The DM can describe the pack's weight pulling on the shoulders.

## Step 1 – Note Strength:

Your Strength score.

---

## Step 2 – Compute:

Strength × 15 lb (capacity) and Strength × 30 lb (push).

---

## Step 3 – Add up:

Gear, coins (50 coins ≈ 1 lb) and treasure.

---

## Step 4 – Compare:

Beyond capacity, the DM may impose penalties (variant).

---

## Step 5 – Adjust:

Adjust for the creature's size.

*Example: Brann (Strength 14) carries up to 210 lb and pushes up to 420 lb.*
