**Level 1 – Abjuration**
Casting Time: **Reaction**, which you take when you are hit by an attack roll or targeted by *Magic Missile* · Range: Self
Components: V, S · Duration: 1 round
Classes: Sorcerer, Wizard

An imperceptible barrier of magical force protects you. Until the start of your next turn, you have a **+5 bonus to AC**, including against the triggering attack, and you take **no damage from *Magic Missile***.

## 🎲 Quick summary:

1. An attack hits you (or you are targeted by Magic Missile): you use your **Reaction**.
2. +5 to AC until the start of your next turn.
3. The triggering attack may now miss.
4. Magic Missile deals you no damage.

---

## ⚠ Flaw in the rule and fixes Table rule

The text doesn't say whether you know the attack roll before reacting. Fix: the DM announces before the game that you can react **after** seeing the roll's result, but before damage.

## 💡 Narrative option: Table rule

The DM can describe a flash of light materializing in front of the caster and deflecting the blow.

## Step 1 – Trigger:

An attack hits you, or *Magic Missile* targets you. Your Reaction must be available.

---

## Step 2 – Cast Shield:

Components V, S. You spend a level 1 or higher slot.

---

## Step 3 – Effect:

+5 to AC until the start of your next turn. The triggering attack is compared to the new AC.

---

## Step 4 – Result:

If the attack roll is lower than the new AC, the attack misses. Magic Missile deals you no damage.

---

*Example: Eliot (AC 12) is hit by a bandit who rolled 15. He casts Shield: AC 17. 15 is lower than 17: the attack misses. Until the start of his turn, his AC stays 17.*

## ⚠ Common questions:

### When can I cast it?

When an attack hits you or Magic Missile targets you.

### How long does it last?

Until the start of your next turn.

### Does it protect against the attack that hit me?

Yes: the +5 applies to that attack.

### Does it negate Magic Missile?

Yes: you take no damage from it.

### Does it protect against spells with saves?

No: the +5 applies to AC only.

### What action does it use?

Your Reaction.

### Can I cast it if I already used my Reaction?

No.

### Does it stack with a shield?

Yes: it's a bonus to AC. Table rule

## ⚠ Debate points and table options: Table rule

### Reacting after the roll

The trigger is "being hit". **Option**: the DM announces the roll; or only says "hit / miss".

### Critical Hits

A Critical Hit always hits. **Option**: Shield can't prevent it; or it does if the total roll is lower than the new AC.

### One Reaction

Shield and *Counterspell* use the same Reaction. **Option**: one Reaction per round, as the rules say.

### Multiple attacks

The +5 lasts until the start of your next turn: it also covers later attacks. **Option**: keep it.

### Automatic effects

The spell only protects against "attack" and Magic Missile. **Option**: no effect on saving throws.

## ⚠ Rule clarifications (answers found on the web, reworded):

### Reaction during your turn

You can cast Shield during your turn, but you expend only one spell slot per turn.

### Shield item and spell

Attacking with a shield doesn't remove its AC bonus. The Shield spell and the shield item are two different things.
