General rule – movement · "Playing the Game" chapter of SRD 5.2.1

On your turn you can move up to your **Speed**. You can split movement before and after your action. **Difficult terrain**, **climbing**, **swimming** and **crawling** cost **1 extra foot** per foot.

You can move through an ally's space but can't stop there. You can only move through an enemy if it is **two sizes larger or smaller**.

🎲 Quick summary:

1. Speed in feet; movement can be split.
2. Difficult terrain, climbing, swimming, crawling: **+1 ft** per foot.
3. Standing up costs **half** your Speed.
4. You move through allies, not enemies (unless 2 sizes apart).

⚠ Change from 2014

The 2024 text keeps the same rules but clarifies moving through creatures and movement costs.

⚠ Flaw in the rule and fixes Table rule

Jump and fall distances need conversions. Fix: use the table on the next page.

💡 Narrative option: Table rule

The DM can describe terrain (mud, brambles) so movement costs feel intuitive.

Step 1 – Know your Speed:

It depends on species, armor and conditions (Grappled, Exhaustion).

Step 2 – Spend it:

Each foot moved costs 1 ft; difficult terrain counts double.

Step 3 – Stand up:

Going from Prone to standing costs half your Speed. Not possible with Speed 0.

Step 4 – Move through:

Allies: yes; enemies: only if 2 sizes apart; never stop in an occupied space.

Step 5 – Jump, climb, swim:

See the table: each foot costs 1 extra without a dedicated Speed.

Example: Mira has Speed 30 ft. She stands up (15 ft) then runs 10 ft through mud (20 ft): no movement left.

Situation	Cost / result
Difficult terrain	+1 ft per foot
Climbing / swimming	+1 ft per foot (without a dedicated Speed)
Crawling	+1 ft per foot
Standing up	Half your Speed
Long Jump	Strength score in feet, with a 10 ft run-up
High Jump	3 + Strength mod. in feet, with a 10 ft run-up
No run-up	Half the distance
Falling	1d6 bludgeoning per 10 ft (max 20d6), lands Prone

⚠ Common questions:

Can I split my movement?

Yes: before, between and after actions.

Can I move through an enemy?

Only if it's two sizes larger or smaller.

Can I stop on an ally?

No: you can't end in an occupied space.

How much does standing up cost?

Half your Speed.

What's a jump without a run-up?

Half the distance.

Fall damage?

1d6 bludgeoning per 10 ft, max 20d6.

What happens at Speed 0?

No movement, can't stand up.

⚠ Debate points and table options: Table rule

Jump and Athletics

Can a check exceed the distance? **Option**: DC 15 for +3 ft.

Difficult terrain and flying

Does flying ignore terrain? **Option**: yes.

Tight space

Moving through a smaller space. **Option**: Disadvantage on rolls.

Falling on a creature

Both take half damage. **Option**: keep it.

⚠ Rule clarifications (answers found on the web, reworded):

Ally

You can move through but not stop in an ally's space.

Climbing

Each foot costs 1 extra, unless you have a Climb Speed.

Swimming

Same rule: +1 ft per foot without a Swim Speed.

Falling

You land Prone unless you avoid the damage.

These points remain open to discussion: your feedback is welcome to refine this sheet.
